## **TIGER R6**

One of Tigers top models the **R6** has been designed for lightness with outstanding handling, this true sports car can be built as an all new sports car fitted with injection and a catalytic converter and obtaining a new current registration plate, or using a pre 95 ford Zetec engine fitted with twin 45 carburettors, manifold, etc (like lotus twin cam) (usually **160 bhp +**). The Tiger designed rear De-Dion is exactly the same unit fitted to the **Tiger Z100** (one of the worlds fastest 0-60 mph cars as seen on BBC top gear with Tiff braking the world record ).

The Tiger R6 is usually purchased as a full kit, or as a chassis body pack and then purchase each item individually as and when you need them, you can do. this over the phone from our massive parts department.

Full space frame 90% round tube chassis powder coated

Complete set of bodywork in a choice of 8 gel coat colours ( body tub, nose cone, bonnet, dash, 2 x front cycle wings, 2 x rear wings)

Cut alloy panel set

Rivets (1000)

Chassis bungs

Copper Brake pipe set

Copper Fuel line

P' Clips

Wiring loom

All the above listed for
